

Sley HORTES

Software Engineer | sleyhortes13@gmail.com | +886 905 811513 | Hualien, Taiwan

Software Engineer with hands-on experience architecting and shipping production systems across multiple domains from high-performance C++ backends and cross-platform mobile applications to full-stack web platforms and deep learning pipelines. Proficient in C++, Go, TypeScript, and Python, with a strong emphasis on clean architecture.

EDUCATION

National Dong Hwa University

Sep 2023 – Jun 2027

B.S. in Computer Science and Information Engineering

Hualien, Taiwan

- Relevant Courses: R (Beginner & Intermediate), Big Data, C++, Data Structures, Algorithms, Image Processing, Machine Learning, Scalable Computing

National Central University

Sep 2022 – Aug 2023

Chinese Language in Chinese Language Center

Taoyuan, Taiwan

EXPERIENCE

National Dong Hwa University

Dec 2025

Big Data Competition 1st Place

Hualien, Taiwan

- Classified Moodle engagement patterns using XGBoost
- Extracted frequency-domain features via FFT and scalogram analysis
- Built Gemini-powered AI assistant for personalized student and instructor feedback

TECHNICAL SKILLS

Languages: C/C++, TypeScript, Python, SQL, JavaScript, R, Go

Frameworks: React, React Native, Node.js, Qt, Flask, Drogon

Tools: Docker, AWS, GCP, Git, Redis, PostgreSQL, MongoDB, Cloudflare

LANGUAGES

French (Native) • **English** (Professional) • **Spanish** (Intermediate) • **Chinese** (Intermediate)

AWARDS

Undergraduate Project Excellent Award Maestro

May 2026

National Dong Hwa University

Two-stream BiLSTM real-time gesture classification.

1st Place Big Data Competition

National Dong Hwa University

PROJECTS

NDHU Task Management [\[GitHub\]](#)

- Built a full-stack mobile task management app with a C++ (Drogon) REST API backend and React Native (Expo) frontend
- Integrated Moodle LMS API to automatically sync course assignments directly into the app
- Deployed on Android with JWT authentication and self-hosted backend tunneled via Cloudflare

Cross-Platform Chat App [\[GitHub\]](#)

- Built high-performance real-time messaging system with voice notes, file sharing, groups, and typing indicators
- Engineered backend concurrency in C++/Qt and responsive frontend in QML

Maestro Hand Gesture Controller [\[GitHub\]](#)

- Two-stream BiLSTM real-time gesture classification pipeline with CI/CD. NDHU Excellent Award 2026

NDHU Second Hand Book Store [\[GitHub\]](#)

- Led full backend architecture (Go) from scratch with REST API design, service logic, and integration with TypeScript frontend and Python AI tooling
- Implemented AI-based book condition classification model in the backend pipeline

JsonFS [\[GitHub\]](#)

- C++ FUSE virtual filesystem mounting JSON files and live REST APIs as navigable POSIX paths
